## **bee: *Break Through Overground***

---

***Break Through Overground*** is the debut album from **bee**, a new pop band with a set of sinfully catchy and rocking melodies. It's brainchild of songwriter, singer, and multi-instrumentalist **Nicholas Markos**, who had built a solo career with wonderfully eclectic indie releases and live sets opening for Bob Dylan, The Violent Femmes, Melissa Etheridge, and others. bee teased the world with the brilliant "The Theme From Hot Doug's" in early 2005. Hot on its heels, ***Break Through Overground*** expands the strong, hooky melodies and concentrated pop-rock arrangements into deeper, soulful songs. In addition to being the perfect pop music for putting the top down and cranking the tunes on a summer drive, these hooks have real heart. The songwriting and sound have been compared to the most respected work of David Gray, Oasis, and The Killers.
